WORKING DATA FOR DEMAND ANALYSIS. Revised by Ann Duncan. Economic Research Service, U.S. Department of Agriculture, Washington, D.C. 20250. ERS Staff Report No. AGES850606. Revised April 1985. Issued June 1985.

ABSTRACT

The attached tables contain a number of time series frequently used in statistical demand analysis. These tables are revised annually by Ann Duncan of the Office of the Administrator, 447-8378. The exact status of each series can be ascertained from the footnotes. Since some of these data are regularly compiled by other agencies, we suggest that current revisions of basic data, particularly the estimates of total income and expenditures of the Department of Commerce and the estimates of prices by the Bureau of Labor Statistics, can best be obtained directly in publications from those agencies.

FOOTNOTES

1/ Bureau of the Census.

2/ Farm population of the United States as of April 1; estimated jointly by ERS and the Bureau of the Census. Beginning 1943, series revised for new definition of farm population; beginning 1960, includes 50 States; beginning 1978 new definition includes only places with sales of $1,000 or more per year.

3/ Includes 50 States, beginning 1960. Current data in Survey of Current Business published monthly.

4/ Data from Economic Indicators of the Farm Sector.

5/ Economic Research Service, Crop Reporting Board.

6/ Data from Food Consumption, Prices, and Expenditures, Economic Research Service.

7/ From table 1, page 3. Beginning 1960, includes 50 States. Includes members of the Armed Forces beginning 1943.

8/ Civilian per capita consumption index multiplied by population index and divided by 100.

9/ Beginning 1960, includes 50 States.

10/ Department of Labor, Bureau of Labor Statistics. Beginning 1978, consumer price index data relate to all urban consumers. Earlier data related to urban wage earners and clerical workers.

11/ Non-seasonally adjusted.

12/ For annual data beginning 1943, see table 3.

13/ Saving as percent of disposable income.
